# Getting the best outcome without risking quality, time and money...

## SOURCING SERVICES

### Supplier Sourcing Research

#### What you get?

A comprehensive report with as many suppliers we can get with their commercial profiles, product category price references and a practical comparison matrix.  
 (Avg. 5-10 suppliers)

#### Why and when you need it?

SSR is recommended when you handle a large number of products in a certain category and what you need is an overview of your industry suppliers for a more effective sourcing and supplier selection strategy.

### Trade Fair Representation

#### What you get?

For a small portion of the cost of doing it on your own, a GIS Sourcing Specialist will attend in your representation to any trade show of your interest and obtain a detailed pool of suppliers' information for products, certifications, capabilities, special requirements check, etc...  
 ( Avg. 10-15 suppliers' profiles & quotations per product category)

#### Why and when you need it?

At the minimum possible cost and without the hustle to traveling abroad, keep your self up to date on the latest products and market trends in your industry.

## ON-SITE SUPPORT

*Enjoy specialized on-site support during your business trips and all along the sourcing process!*

### Trade Mission Support

#### What you get?

Interpretation, domestic traveling arrangement, price negotiation & general professional support.

#### Why and when you need it?

When traveling abroad, it is crucial having local assistance to avoid any risks and get your message across within a different cultural environment. Make sure your expectations, requirements and pricing demands are well understood during the visits to suppliers or during the trade fairs you attend to. Also, to let suppliers acknowledge that you have local representation that will be taking care of your interests.

### Sample Management

#### What you get?

Samples Consolidation, Confirmation & Shipping

#### Why and when you need it?

To consolidate, analyze and confirm samples from one or many suppliers at origin, receive a sample report within 24 hours and have a reliable team to arrange sample shipments to any destination.

### Full Sourcing Support

#### What you get?

A local Sourcing Analyst to support you locally for the entire supplier sourcing and product development stages.

#### Why and when you need it?

In most of cases, handling purchasing projects abroad is complicated due to time difference, cultural/language barriers, logistics constraints, etc... By having a local specialist support (GIS Project Manager) you will enjoy the flexibility and security needed to speed-up all product sourcing and supplier selection processes.

# GIS INTRODUCTION

## About GIS...

GIS International is an international firm committed to deliver COST EFFECTIVE and QUALITY ASSURED products and services from China and greater Asian countries.
